## PROFILE

With over 5 years of experience in back-end and front-end development with PHP, CSS, HTML, HTML5, jQuery, Javascript, CSS3, i aim to always enhance my skills and learn no matter what project i am involved to.

I taught myself to learn new tools and techniques throught my career and constantly i try to keep update about the news of my area.

## EXPERIENCE

2015

### ADVFN - PHP Developer

Back to ADVFN, but this time around more focused on help to "clean the house", creating new banner formats for commercial team in their **Database**, help the operational team with banners' problems (mainly caused by **HTML5**), creating new **jQuery Plugins**, getting in touch with the USA team for weekly meetings to discuss about the projects in **JIRA** and also developing new tools for the website.

2014

### Grupo LTM - Front-End Developer

First time being away from PHP, i have learnt about **code standards for HTML** and **CSS** classes, built **jQuery Plugins**, got more in touch with **HTML5**, **CSS3** and **Responsive Design** and also i had a little bit of **Angular** and **.NET**, all of this while working with time management schedules to deliver the project to the Dev Team on the right time.

2012

### ADVFN - Junior PHP Developer

As developing my skills with PHP, i had the chance to understand more about the financial world and put all this knowledge to the test, like:

- Helping the team build new tools for the website (with **PHP Object-Oriented**);
- Learn new management methodologies like **Kanban**;
- Getting in touch with version control (**GIT**) and commands to manipulate the files (using **VIM** as editor), as well as using a repository Code Review (**Gerrit**);
- Help the commercial team with their campaigns' needs.

2012●

## CVS Ad.Agency - Front-End Developer/Graphic Designer

Working in one of the most growing startups agencies based in Alphaville was a great experience not only because it was my first job but because i had the opportunity to work in many areas of the company. I started as a junior Graphic Designer, doing newsletters and websites designs and later i fell in love with back-end and front-end development.

I also had the chance to work with SEO tools, like **Google Analytics** and **Reinvigorate** (providing heatmaps of all of our client's websites). Here's all the tools as well as programming languages that i had in touch while working there:

- Adobe Photoshop;
- Responsive Design;
- HTML;
- PHP;
- WordPress: developing themes and plugins from scratch;
- SQL;
- CodeIgniter;
- CSS;
- HTML5;
- jQuery;
- Javascript.

## EDUCATION

2016●

### Universidade Paulista - UNIP

Bachelor of Information Systems

2010●

### ITB - Instituto Técnico de Barueri

Technician certification for Web Design
